# Srđan Čukić

Front-end Developer

## PROFILE

I am a passionate frontend developer dedicated to building modern, user-friendly web applications. My journey in web development started with self-learning, exploring JavaScript, React, and other cutting-edge technologies. I love solving complex problems and continuously improving my skills. When I'm not coding, I enjoy hiking, playing video games, and spending time with family.  More projects on my GitHub.

## EXPERIENCE

Front-end Intern — Bee.IT (Novi Sad)
May 2025 — October 2025
Worked as part of a development team on a **Salesforce Commerce Cloud (SFRA)** project, focusing on backend integration and logic implementation.
Key responsibilities:

- Developed and maintained custom SFRA jobs for data export and API integration

- Used **Trello** for task management and **Bitbucket** for version control

- Collaborated with senior developers to improve workflows and optimize debugging processes

## PORTFOLIO

◆ Personal Portfolio Website

Tech: React (TypeScript) → Astro.js, TailwindCSS

A modern personal portfolio showcasing frontend projects, skills, and UI/UX design. Originally developed in React with TypeScript, later refactored in Astro.js for faster performance and optimized SEO. Features smooth scrolling, responsive design, and a visually engaging interface with custom animations.
